# Welcome to our 21st Annual On-Property Ram Sale

Prime lamb sires have been bred at Fairbank since the property was purchased by our family in 1903 and continue to be the major enterprise on the property. We aim to breed structurally superior rams that contain balanced ASBVs with Lambplan being utilised since its inception.

The sale will again be interfaced with auctions plus. Attendance on the day is still encouraged however the online platform does allow purchasing of stock without being present. We aim to provide video footage of each lot that is a true representation of that animal.

This years sale is one of our largest offerings of terminal genetics and will again feature not only our Poll Dorset, White Suffolk and Southdown rams but also our terminal composites (Southdown x Dorset and Charollais x Southdown/Dorset).

- Lambplan taken from 01/10/2025 run
- All rams are vaccinated with Glanery 7 in 1
- Drenched with Startect - 25/09/2025
- Fairbank is ovine brucellosis accredited free
- OJD MN1V Status and are a 2nd generation approved vaccinated flock being vaccinated against OJD since 2003
- Southdown Stud Breeders Note: The entire Fairbank ewe flock is negative for gaucher disease either by testing or by pedigree (both sire and dam previously tested as non carrier). This offering of 2024 drop animals are all negative by pedigree except for Lots 9,10,14 & 54 which are by NZ rams and are currently under testing to confirm negative status. All dams of these lots are tested negative.

**All ram LOTS are offered as flock rams, however should a transfer be required a minimum price of \$3000 will apply and nominated at the fall of the hammer.**

We would be happy to personally deliver within mainland Tasmania any rams not taken on the day. We thank you all for your interest in our sheep.

*The Badcock Family*

**Lambplan** has been used since its inception at Fairbank and whilst some selection criteria is placed on Lambplan ASBV's it is well known that we will not compromise structure or breed type to gain additional estimated breeding values. Lambplan is a guide to assist you in making decisions based on the genetic merit of each animal but should not replace visual selection. Balanced ASBV's are important for consistency of progeny but most importantly rams should be both fertile and structurally correct.

**WT: Weight (kg)** Rams with a more positive ASBV for weight (WT) will produce lambs that grow faster and therefore reach target weights in a shorter period of time. WT ASBVs are reported at weaning (**Wwt**) and post-weaning (**Pwwt**).

**Pemd: Post eye muscle depth (mm)**

Rams with a more positive ASBV for eye muscle depth (EMD) produce lambs that have more muscle. A ram with an ASBV of 1mm will breed lambs with 0.5mm more eye muscle than a ram with an ASBV of 0mm.

| Bwt  | Wwt  | Pwt  | Pfat | Pemd |
|------|------|------|------|------|
| 0.20 | 10.8 | 16.7 | 1.0  | 3.4  |

**Bwt: Birth Weight (kg)** Rams with lower ASBV's for Bwt produce lambs that are lighter at birth. Equally, selecting rams that are too low can compromise survivability. A ram with a Bwt of 0.20 will produce lambs that are 100gms heavier than a ram with 0.00.

**Pfat: Post fat (mm)** Rams with more positive PFAT ASBVs will produce lambs that are fatter, at the same weight post-weaning. This ram will produce lambs that are on average 0.5mm fatter at the GR site when compared with an ASBV of 0mm.

**SHEARF5: Shear force (nM)** Shear force (SF5) is a measure of the force or energy required to cut through the loin muscle of lamb after 5 days of ageing, the ASBV is reported in deviations of kilograms of force. Rams with more negative SF5 ASBVs produce lambs with more tender meat.

**LMY: Lean meat yield (%)** Rams with more positive LMY ASBVs produce lambs that have a higher lean meat yield at slaughter. Lean meat yield is expressed as a percentage of hot standard carcass weight, where all bones and salvage fat are removed. A ram with an ASBV of 2.4 will produce progeny that are 1.2 percent higher than progeny of a ram with an ASBV of 0.

| IMF  | ShearF5 | LMY |
|------|---------|-----|
| -0.1 | -0.5    | 2.4 |

**IMF: Intramuscular fat (%)** Rams with more positive IMF ASBVs produce progeny with more intramuscular fat. It is a measure of the fat percentage in the loin muscle of a lamb and is often referred to as marbling. IMF has been shown to have a significant impact on the flavour, juiciness, tenderness and overall liking of lamb.

**EQ** - Targets a prime lamb operation where terminal sires are joined to ewes of a merino/maternal breed or cross, and where producers are interested in improving the eating quality of their lambs to a greater degree than is possible with the TCP index. Because the added emphasis is on eating quality, there is less emphasis on growth and carcass traits, although they will still improve.

The traits in the EQ index and how they contribute to the overall balance of the index.

**TCP:** TCP: The TCP Index has been created to assist producers to achieve both gains in their major production traits, such as postweaning weight and muscling, as well as ensuring consumer satisfaction from lamb is maintained through focusing on key eating quality traits such as shear force (tenderness) and intramuscular fat (marbling).

The traits in the TCP index and how they contribute to the overall balance of the index.

*Congratulations to*  
**FAIRBANK**

**140031, 161461 & 230020**

WITH 5 STAR DATA QUALITY

**2025**

Sheep Genetics would like to congratulate and thank you for your hard work and dedication to collecting and submitting high quality data.

# SOUTHDOWN EWES

**Southdowns have been a successful enterprise at Fairbank since 1922 spanning four generations, with both ram and ewe sales to all states and overseas during this time. This years offering consists of not only outstanding outcross sires but progeny from our elite home bred sires that have been retained as they were the best of each drop.**

This years Southdown offering include progeny of:

|                        |                                                                                                                                                                                                                                                                                      |
|------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Fairbank 210915</b> | Broke his sires auction record from 2020 selling to Nedelle Downs and Kirkdale studs for \$11,400 in 2022 (semen share retained). Elite ram with both performance data and structure. Champion Ram Geelong, Res Champion Bendigo, Interbreed Launceston in 2022. 12 rams and 2 ewes. |
| <b>Fairbank 220888</b> | A well balanced, correct ram by the outstanding sire FB190751. A long ram with strong head. 7 rams and 2 ewes                                                                                                                                                                        |
| <b>Fairbank 220941</b> | Used as a lamb and retained for further stud duties. By FB190807. Very correct low Bwt sire. 6 rams and 1 ewe                                                                                                                                                                        |
| <b>Fairbank 191007</b> | High performance ram ranked #1 Southdown sire for both TCP and EQ indexes. Sold to Banquet Stud in 2020 for \$8,200. Combining the best home bred sire line with the best NZ dam lines. 5 rams                                                                                       |
| <b>Fairbank 221002</b> | Another FB190751 son. Lower set with a huge hind quarter, Top ram for muscle ranking at #3 Southdown sires for Pemd. 3 rams and 2 ewes                                                                                                                                               |
| <b>Fairbank 210919</b> | Sold to Red Gum stud for \$5,000 in 2022. Son topped our 2024 sale selling to \$7,750 to Lansdale Stud. By Fernhill 140218 this high performing sire has above av. Pemd and puts shape into his lambs. 4 rams                                                                        |
| <b>Fairbank 150608</b> | Reserve Champion Geelong 2016. A high Pemd Willowhaugh 521 son. Extremely clean headed. 4 rams                                                                                                                                                                                       |

This years Southdown offering include progeny of:

|                                         |                                                                                                                                                                               |
|-----------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Merrydowns 080681<br>Willowhaugh 030175 | Used by AI. Probably the last opportunity to secure rams by these top NZ sires. WH 030175 was Champion at Christchurch. 4 rams                                                |
| Fairbank 230807,<br>230846 & 230849     | Ram lambs used to back up AI programs. FB230807 sold to Lansdale Stud \$7,750. FB 230846 is ranked #2 Southdown sire for TCP and #1 Southdown sire for Pemd. 6 rams and 1 ewe |

# TERMINAL COMPOSITES

## SOUTHDOWN X POLL DORSET & CHAROLLAIS X POLL DORSET/SOUTHDOWN

Our composite breeding program commenced initially to provide better use from some of our Southdown sires by putting them over good linkage Poll Dorset ewes. This resulted in higher lambplan accuracy on Southdown sires. Our Southdown X rams provide rams that contain the best traits of the Southdown and Poll Dorset. Clean points, moderate birth, good growth and muscle as well as tight skins. Suitable to be used over any ewe class.

The Charollais cross project came about due to having some outstanding ewes coming out of our Southdown x Dorset terminal program. We identified the Charollais had exceptional hind quarters and natural low birth weights. We wanted to back this up with some Lambplan ASBV's, but also add some body length to the Charollais and improve the face colouring. These rams are ideal for specific ewe lamb joinings.

# WHITE SUFFOLK

Our White Suffolks commenced in 1996 using Fairbank Poll Dorset ewes and the proven South Australian White Suffolk genetics. Since then carefully selected mainland and Tasmanian sires have been utilised to produce structurally correct and well muscled rams suited to a wide range of conditions and locations. Our White Suffolk's are very consistent and express great breed type, structural correctness and muscling.

**This years White Suffolk offering include progeny of:**

|                                                |                                                                                                                                                                                                                    |
|------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Felix 211239</b>                            | Used by AI with over 1300 progeny in 34 flocks this sire has had significant influence. Very Low Bwt (lowest 5%) massive Pemd (top 5%). Also top 1% IMF and top 5% Shear Force.17 rams                             |
| <b>Ashmore 220084</b>                          | Very correct high performance ram with good balanced data. Top 5% TCP and PWT and top 20% Pemd. 12 rams                                                                                                            |
| <b>Ashmore 221308</b>                          | This ram made headlines by selling progeny to \$60,000 at a recent production sale. Top 1% TCP and Pemd. Smoothe and balanced ram. Over 1400 progeny in 22 flocks nationally. Sired this years keeper ram. 11 rams |
| <b>Somerset 220461</b>                         | High Pwt and Pwt ram. Provided some good outcross genetics and has bred shape into his progeny.6 rams                                                                                                              |
| <b>Fairbank 200687 &amp; 210529</b>            | Used as back ups. Both rams have been solid breeders here for some time and it doesn't matter what ewes they go to. 6 rams                                                                                         |
| <b>Fairbank 230499, 230503, 230587, 230607</b> | Ram lambs used to back up AI programs. 230499 was retained in the stud.                                                                                                                                            |

# POLL DORSET

**Our Poll Dorsets were established in 1969 by selecting the top ewes from leading Tasmanian studs. Since then we have carefully selected the best available genetics by either natural mating or A.I as well as our own top rams to produce commercially relevant industry sires.**

**This years Poll Dorset offering include progeny of:**

|                                     |                                                                                                                                                                                                                                                                                                             |
|-------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Fairbank 210213</b>              | This ram keeps breeding better and better. Ranked in the top 50 of all Poll Dorsets sires for TCP. Top 1% TCP and Top 5% Pemd and Top 10% Pwt. By Old Woombi 160165. Joined heavy again in 2025. 20 rams                                                                                                    |
| <b>Derrynock 200057</b>             | By the famous Linton 160625 who was also used for this drop, D200057 was used for his good eating quality traits. Top 10% for IMF and Shear Force as well as being the top 20% for Pemd this ram provides improvement to eating quality but retaining commercial carcass traits. 11 rams                    |
| <b>Melton Vale 220563</b>           | The keeper ram from the Melton Vale flock he is a correct well muscled ram with a good strong Dorset head. Top 1% TCP and Pemd he also has the addition of good growth with a very low Bwt. 7 rams                                                                                                          |
| <b>Fairbank 210132</b>              | Our second Old Woombi 165 son that we retained. 132 is long with a very good shoulder. Low Bwt with good growth. Sound and safe breeder. 7 rams                                                                                                                                                             |
| <b>Linton 160625</b>                | A sire well known for his eating quality traits. For many years 625 sat at the top for both IMF and shear force. Over 1300 progeny in 30 flocks. He still sits in the top 1% for both IMF and Shear Force. Used to provide a strong linkage sire for eating quality traits. 6 rams as well as a keeper ram. |
| <b>Fairbank 220230</b>              | By our outcross sire Ridgehaven 190083. 230 is a powerful ram with good bone. very good phenotype. 5 rams                                                                                                                                                                                                   |
| <b>Bruan 220297</b>                 | A low Bwt sire with very good IMF (Top 5%). 4 rams                                                                                                                                                                                                                                                          |
| <b>Pepperton 200113</b>             | Following on from how he bred the previous year we used 200113 for a second time. Low Bwt with a massive Pemd this ram is top 1% TCP and Pemd. Bred more females than males this year so just the 2 rams plus another keeper ram.                                                                           |
| <b>Fairbank 230079 &amp; 230138</b> | Ram lambs used to back up AI programs. 4 rams                                                                                                                                                                                                                                                               |
